

CERRADINHO NA COMUNIDADE

CerradinhoBio announces support for social initiatives in Chapadão do Céu

This year, so that local entities could apply for their sponsorship and donation solicitation projects, CerradinhoBio offered specific training on Tax Incentives for Fundraising. **In total, 30 projects from 16 entities/individuals were submitted.**

"I was pleased and honored to participate in this process. Congratulations to the company initiative, for the resources allocated to the projects; to their collaborators, who fairly, responsibly and with great professionalism led such choices, showing that they are committed to the welfare and quality of life of the citizens of the state." **Prof. Liziane Hoff, Member of the Social Investment Committee**

After detailed analysis based on criteria pre-established by the company, **six projects were selected that together will receive a total of R \$ 263,324.00.** The amounts will be made available to the Institutions after submission of documentation to formalize the Agreement.

"This donation will greatly help in the completion of the construction of the new college, which will be able with this work, receive more students and even make partnerships with universities or technical courses, thus benefiting the population of Chapadão do Céu who wants to study. As the director of this institution, I thank everyone who took a different look at our project." **Rozane Pelisson Filipin, director of the Alicerce College.**

The assessment was made by the company's **Social Investment Committee**, made up of CerradinhoBio employees and members of the civil society of Chapadão do Céu, who are not directly or indirectly involved in the registered projects.

Maurício Heusy (HR), Walter Di Mastrogirólamo (Industry) and Jéssica Lara Chaves (CSR), employees of CerradinhoBio and Divani Rodrigues, Liziane Cristina C. Hoff and Dirceu Ribeiro Martins, members of the community, were members of the evaluation committee. Committee members will now have the mission to monitor the implementation of the approved initiatives.

The selected projects are **self-sustainable, focused on the areas of Education, Health and Public Safety**; The entities that will benefit (**APAE, Micael School, Cancer Fighting Volunteer Center, Uriel Daycare Center, Public Security Council and Alicerce College**), should invest the resources in the expansion of physical facilities and also in the improvement of community service.
